# Mobile Broadband

APN settings for Dialog Mobile Broadband

Please follow the below steps to configure the **APN**
(one time configuration)

1. Plug the modem through the USB port to the computer and install the Mobile Partner Software

2. Open Mobile Partner Software and Click on the **Tools** menu and select **Options**

3. Select **Profile Management** to create the new profile. Then click on **New** to start creating a new profile.

4. Configure a profile name as you wish, for example **Dialog Mobile Broadband**.

5. In the APN section select **Static**.

6. Fill the **APN** name according to the data package in the settings as mentioned in screen below and save the changes to be applied.

   APN name for a Prepaid Data Package   : **ppwap**

   APN name for a Postpaid Data Package : **Dialogbb**

7. Click **Set as Default** to make the newly created profile.

8. Click **OK** to return to main menu of Mobile Partner.

9. On the Mobile Partner main menu, select created profile name
   (example **Dialog Mobile Broadband**) in the connection before connecting to the Internet.
